PROFILE

Backend-oriented Full-Stack Developer with production experience in Python/FastAPI and PostgreSQL, covering API design, relational data modeling, authentication, and backend architecture. Applies unit and integration testing (pytest) as part of the development workflow. Uses AI coding assistants (Claude Code, GitHub Copilot, Cursor, Codex) as part of the daily development workflow, with critical review of AI-generated code before merging; hands-on experience building production LLM integrations (OpenAI API, Anthropic API) adds a practical understanding of AI system behavior and limitations.

WORK EXPERIENCE

Full-Stack Developer 2025 – 2026
PH.Digital, Tel Aviv

- Designed and maintained backend systems with **Python/FastAPI**, owning API design, **PostgreSQL** database schema, and business logic end-to-end.
- Implemented secure **JWT** authentication with role-based access control, and async background job scheduling for a production business platform.
- Wrote unit and integration tests (**pytest**) as part of the development workflow, covering business-critical logic.
- Integrated third-party **REST APIs** and external business systems, building automated workflows; delivered consistently in **Agile** sprints (stand-ups, sprint planning, retrospectives) with frontend and product teams.

Sales Team Leader 2019 – 2025
Pcom Solutions, Tel Aviv

- Led a team of 3–4 sales representatives; managed pipeline, KPIs, and enterprise client relationships.
- Grew team revenue **30% YoY**.

EDUCATION

Full-Stack Development – John Bryce, Tel Aviv
990 hours, 2024 – 2025

- Program covering end-to-end web development with **Python** (Django, FastAPI, Flask), **React**, and **Node.js**.
- Built full-stack projects with **GenAI** integrations (OpenAI API, LLM pipelines); practiced Clean Code and SOLID principles.
- Gained hands-on experience with DevOps workflows: **Git**, **GitHub**, **Docker**, **AWS EC2** deployment.

SKILLS

Backend Python (FastAPI, Flask), Node.js (Express), RESTful APIs, pytest (unit & integration testing)

Databases & SQL PostgreSQL, MySQL, MongoDB, SQLAlchemy, SQL

AI-Assisted Development Claude Code, GitHub Copilot, Cursor, Codex

Tools and Cloud Git, GitHub, Docker, Postman, AWS EC2

Generative AI Prompt Engineering, OpenAI API, Anthropic API, LLM integration
