PROFILE

Full-Stack Developer focused on Python/FastAPI, React, and PostgreSQL. Experienced in building internal business platforms and workflow systems, designing backend APIs, database models, authentication flows, and business logic-heavy features. Prior client-facing experience translates directly into product sense and business context.

WORK EXPERIENCE

Full-Stack Developer2025 – 2026
PH.Digital, Herzliya

- Designed and maintained end-to-end web applications with React (frontend) and Python/FastAPI (backend), owning the full stack from database schema to API layer.
- Built and maintained a production business platform with PostgreSQL, implementing complex business logic, secure JWT authentication, and async background job scheduling.
- Set up CI/CD pipelines (GitHub Actions) covering linting, automated tests, database migration checks, and OpenAPI contract sync between backend and frontend.
- Built and maintained a customer-facing marketing site with Next.js (App Router, React Server Components), TypeScript, and Tailwind CSS, including form validation, RTL Hebrew localization, Sentry error monitoring, and a Vitest test suite.
- Integrated third-party REST APIs and external business systems, building automated workflows for document generation, client communication, and financial reporting processes.
- Delivered features consistently in Agile sprints (stand-ups, sprint planning, retrospectives), collaborating with frontend and product teams.

Team Leader / Sales Supervisor2020 – 2025
