ABOUT

Full Stack Developer with professional experience in building scalable web applications and integrating AI/ML solutions. Proficient in modern web development practices, from designing robust backends and efficient databases to creating dynamic, user-centric frontends. Passionate about clean code, performance optimization, and delivering high-quality software solutions.

PROFESSIONAL EXPERIENCE

Full Stack Developer | PH.Digital | 2025 – 2026

- Developed and maintained end-to-end web applications using React and Node.js/Python.
- Implemented complex business logic and integrated third-party APIs to enhance system functionality.
- Optimized database queries and backend performance to ensure seamless user experience.
- Collaborated with cross-functional teams to deliver production-ready software in an agile environment.

Sales Team Leader | Pcom Solutions, Tel Aviv | 2019 – 2025

- Led a sales team and drove 30% revenue growth through KPI ownership and execution.
- Managed high-stakes negotiations and long-term customer relationships with cross-functional collaboration.
- Coached and mentored team members to improve funnel conversion and forecast accuracy.

EDUCATION

Full Stack Development | John Bryce, Tel Aviv (990 hours)

- Comprehensive hands-on program focused on end-to-end web development using Python, React, and Node.js.
- Building data-driven applications, integrating Machine Learning models, and implementing Clean Code principles.
- Developed production-ready full-stack applications, gaining proficiency in modern DevOps workflows, including Git version control, Docker containerization, and AWS cloud deployment.

SKILLS

Backend: **Python (FastAPI/Flask), Node.js (Express), RESTful APIs.**

Frontend: **React, TypeScript, HTML, CSS.**

AI & Machine Learning: **PyTorch/TensorFlow, OpenCV, Computer Vision (ResNet), Scikit-learn, numpy.**

Generative AI: **Prompt Engineering, Integration of LLM APIs (OpenAI/Anthropic).**

Databases & ORM: **PostgreSQL, MySQL, MongoDB, SQLAlchemy, Sequelize.**

Web Scraping: **BeautifulSoup, Selenium, Scrapy.**

Tools: **Git/GitHub, Docker, Postman.**

Cloud: **AWS (EC2).**
