PROFILE

Full-Stack Developer with hands-on production experience in Next.js (App Router, React Server Components), React, and Python/FastAPI, owning customer-facing web applications end to end: from PostgreSQL data models and REST APIs to the finished interface. Comfortable working across the full stack, including complex SQL and CI/CD pipelines, with daily use of AI coding agents (Claude Code) as a productivity multiplier, reviewed and understood at the code level rather than accepted at face value.
