PROFILE

Full-Stack Developer working across Python, Node.js, React, and TypeScript. Owns features end-to-end: database design, business logic, API layer, and UI implementation. Built a production business platform from the ground up and shipped scalable, business logic-heavy features in a collaborative team. Prior team-leadership and client-facing experience adds strong product sense and the ability to drive technical decisions across teams.

WORK EXPERIENCE

Full-Stack Developer 2025 – Present
PH.Digital, Tel Aviv

- Owned features end-to-end with **React/TypeScript** on the frontend and **Python/FastAPI** and **Node.js** on the backend, from database schema through business logic and API to UI implementation.
- Built and maintained a production business platform on **PostgreSQL**, designing relational data models, complex business logic, secure **JWT** authentication, and async background job scheduling.
- Integrated third-party **REST APIs** and external enterprise systems, building automated workflows for document generation, client communication, and financial reporting.
- Drove technical decisions in feature kickoffs and delivered consistently in **Agile** sprints, collaborating with frontend and product teams.

Sales Team Leader 2019 - 2025
Pcom Solutions, Tel Aviv

- Led a team of 3–4 representatives; managed pipeline, KPIs, and enterprise client relationships.
- Grew team revenue **30% YoY** through structured tracking and process improvements.

EDUCATION

Full-Stack Development - John Bryce, Tel Aviv
990 hours, 2024 - 2025

- End-to-end web development with **Python** (FastAPI, Django, Flask), **React**, **Node.js**, and **TypeScript**.
- Built full-stack projects with **GenAI** integrations (OpenAI API, LLM pipelines); applied Clean Code and SOLID principles.
- DevOps workflows: **Git**, **GitHub**, **Docker**, **AWS EC2** deployment, CI/CD basics.

SKILLS

Backend	Node.js (Express), Python (FastAPI, Flask), RESTful APIs
Frontend	React, TypeScript, JavaScript, HTML5, CSS3
Databases & SQL	PostgreSQL, MySQL, MongoDB, SQLAlchemy, SQL
Tools and Cloud	Git, GitHub, Docker, Postman, AWS EC2
